Abstract

The abstract of the research should be completed with a conciseness. A Thai version is not allowed more than 10 lines. Research objectives, population, research instruments, data analysis and research result should be well indicated not more than 250 words.

The research result reveals that

.....

.....

.....

Keywords : / / / / (approximately 3 – 5 words)

Example Family / Elderly people / Quality of life

Abstract

An English version is not allowed more than 250 words. A content must be relevant to Thai version.

.....
.....
.....
.....
.....

Keywords : / / / / (approximately 3 – 5 words)

Example Family / The elderly / Quality of life

Please notice on using a capitalization, except technical terms.

Introduction

A background and reason leading to a research have to be well indicated. The source of information, statistic, findings and references should not be more than 10 years to be referred (theories or some historical documents are an exception).

Example

Regarding to a study of Philip (Philip, 2010), it reveals that crucial factors to an achievement of Small and Medium Enterprise are related to the study of Micheels and Gow (Micheels & Gow, 2015) which indicates that

Nevertheless, the study of Philip has different aspects of

.....

Research objectives

1. Research objectives should be relevant to a research topic and a content mentioned in an abstract.

.....

2.

.....

Scope of the study

1. Population and sample group

What is your research population? How many people? (please refer to the source of information—National Statistical Office, 2016)

How many sample participants in your research? How to find your sample group? What are your procedures to assort a sample group? (referenced document in sorting a sample group should not be more than 10 years).

Example

Sample participants are people who live in Photharam Province have well calculated from a formula calculation of Taro Yamane (Taro Yamane, 1973) by specification a trust with 0.95 (Thanin Silpjaru, 2012). Sample group are consisted of 400 people. A random sample group has applied with a quota sampling classified by an ethnicity in Photharam District for 5 ethnic groups—80 people for each ethnic group. Selection of each ethnic group has applied with an accidental sampling (National Statistical Office, 2016).

2. Research variables

.....
.....
.....

Research methodology

This study is (such as survey, qualitative research, experimental research, mixed-methods, etc.)

Research instrument

An explanation of research instrument, characteristic research instrument, research instrument quality check and generalizing a research instrument to participants should be well informed.

.....
.....
.....

Data collection

Data analysis (for example; using a statistic program in analysis consists of)

Analyzing criterion/ interpretation of 1.00 – 1.49 means
(references which are used as a criterion—Thaninsilpjaru, 2012). A data analysis has been analyzed with grouping as

.....
.....

Research result

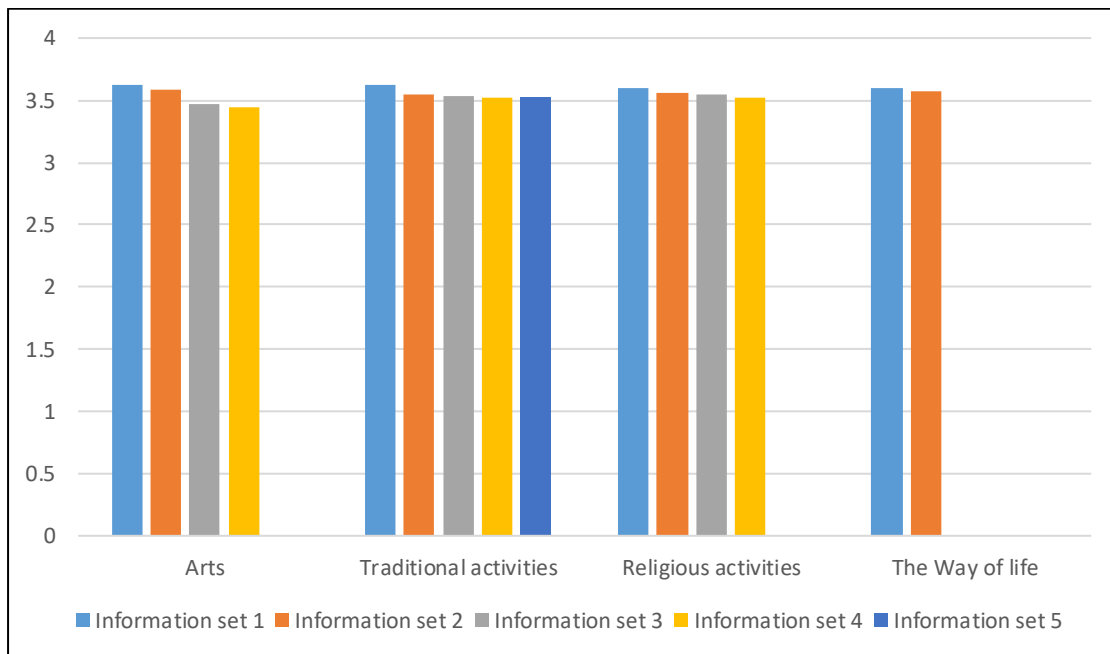

A research result should be indicated clearly, followed research objectives and directed to the point. A significant picture or a table are necessarily required as follows.

Table 1 Comparing an effect from searching the internet of the students in Muban Chombueng Rajabhat University classified by personal information

Level of effect	Personal information	\bar{X}	S.D.	t	Sig. (2 tailed)
The effect of behavior	Gender				
	- Male	2.31	0.29	2.079	0.038*
	- Female	2.24	0.31		
The effect of learning	Having personal computer				
	- Yes	2.51	0.33	2.434	0.015*
	- No	2.41	0.33		

* Statistical significance at 0.05

Example of picture

Picture 1 The chart of measurement in an interpretation ethnic identity

Conclusion

A summary should be indicated to the main point and cover all research objectives that mentioned in a research article.

Discussions of the finding

The conflict finding, relevant finding to a study, other researcher's experiment including theories or concepts used as a framework in research should be explained with reasons; discussed with drawbacks, limitations and advantages of the study. References in a discussion are necessarily required (please study on how to write a reference).

References

In-context references

The finding of food poisoning which is relevant to Kai Trakunkhai (2016) reveals that using a chemical substance in producing a supplement diary food.

The finding of food poisoning concerning to the study in a supplement diary food reveals that using a chemical substance (Kai Trakunkhai, 2016)

Recommendations for further research

1.
2.
3.
4.

References (it should be well indicated in article)

All references should be well put in an indicated article only, all concerned references should not be more 10 years of updating.

A format of references writing must be followed the Publication Manual of the American Psychological Association (APA) 7th Edition.

(Book Format)
